Misuse of School Wi-Fi

THE SITUATION

Students use the school's Wi-Fi to access prohibited sites, not only distracting students and slowing down bandwidth, but also exposing the school's network to security threats like malware and phishing attacks.

THE TASK

**Create an acceptable use policy for the school's Wi-Fi.
This policy might incorporate technical controls like content filters, types of prohibited sites and online activities, and instructions for students and faculty to report Wi-Fi misuse.**

Group Name

ROLES

Principal (Group Lead)
Oversee the development and enforcement of the policy, ensuring it aligns with educational goals, and allocating necessary resources.

Network Engineer
Oversee the technical management of the school's Wi-Fi network, implement security improvements.

Cybersecurity Analyst
Monitor network usage and enforce the acceptable use policy.

Librarian
Assist users in accessing educational resources safely and responsibly.

Computer Science Teacher
Develop educational programmes that include the risks of unsafe browsing and responsible internet usage, considering legal aspects.

Student Body President
Provide insights into student needs and behaviours on the Wi-Fi network.
